

Final Report for Oky Paniagua Granados.
From: Costa Rica.

First let me said thank you for the opportunity to visit Japan , I will never in my life forget this experience, after the training in Japan I have new ideas for implementing in my institution, and I work hard about my project, here there is my schedule

Actividad	método	recurso	tiempo
To identified resources in the city	Meeting with NGO ASADIS,explain the project	Human resource infrastructure	September 2007
Visit small factory of recycle paper in San Luis Monteverde	Meeting with a small group of women(made recycle paper)	Human resource Bus transportation	September 2007
To explore the market	Meeting with small enterprises of the city (craftsman)	Human resource Material resource(infrastructure)	October 2007
Meeting with government	Meeting with some political	Human resource	November 2007
Occupational profile	Meeting with professional (minister of education, National Institute of learn)	human resource material resource(car)	December 2007
To continued occupational pro file	Meeting NGO and government.	human resource infrastructure	January 2008 February
Training how to made paper	class	Recurso human resource infrastructure	March April May
To elaborate a map for drainage system for treated water	Self and study drainage system	Human resource, engineer	May
Buy the machines	Made special equipment to elaborate paper	human resource economic resource	Jun July , august 2008
Start to work in small factory of recycle paper	Work with persons with disabilities and sale the product	human resource material resource economic resource	September 2008 to march 2009.

At this moment I have made some the activities because in waiting to finish all of them with the support of JICA, since I am working in the application form for a follow-up cooperation project.

- When I came back to my country I had a meeting with NGO and explain about I thought in Japan, after I explained my action plan and I elaborated a schedule, my project is about small factory of recycle paper and in my country I found a similar factory of recycle paper in other province, so I visited and they explained to me about how to work the recycle paper and the machines necessities for the project , after I made other meeting with enterprises of Sarchi (the city) and I

explained my project, this meeting was very important because this persons help me to resolve different problems , for example:

- They had opportunity for one stand in the central market of craftsman.
- After the meeting the local bank send to us, every week, recycle paper (black color, special for made recycle paper)
- The National Learning Institute, promise me when we have the factory, a training for people with disability (how to make different techniques, to make the paper: souvenirs, books, box, and others thinks) and now we work together in occupational profile, they propose me a big factory of all types of recycles products and made other types of souvenir (made differents departments of recycle) I considerate maybe in the future because I prefer start only one project (recycle paper) for now.
- The other factory of recycle paper said to me; when we have a factory of recycle paper they going to give training about how to extract natural dyeing for use different color of paper.
- We had a meeting with politicians and they help me to built infrastructure for the factory.
 - And now I am doing application for the follow-up Cooperation for JICA, because we have no money to buy the machines.

strength	weakness
Human resources	Have no money for buy machines
Have Infrastructure	Small space for the factory.
Have recycle paper	
have stand for sale products	

Other project that I going to do is two meetings with professional that work in similar to my Institutions and share the experience of Japan, How the Japanese people see the persons with disability (NGOs and prevocational Institutions) and give my project as a model for give employment to disability people.

And explain different works the PWD have in Japan.

Thank you for the opportunity, sayoonara!
